

PFIZER DIGITAL & TECHNOLOGY HACKATHON 2026

Problem Statements

The Challenge

Create a computational, ML-based, or other solution to improve...

1. Vaccine uptake
2. Pharmaceutical manufacturing accuracy and/or efficiency
3. Computational pre-clinical drug development
4. Tolerability, adherence, and outcomes for GLP-1 therapies
5. Clinical trial recruitment

Companion Documents

This problem statement is part of a three-document package. Use the companion guides to dig deeper into each problem area and to understand how your solution can connect to Pfizer's research, pipeline, and operations.

- Technical Resources — questions to consider and curated reading lists for each problem area.
- Pfizer Overview — portfolio, pipeline, clinical trials, manufacturing, and R&D resources.
